

THE FOUNDATION OF THE 5th OF OCTOBER 1969

Opportunity to apply to a rehabilitation program – for employees at Atlas Copco Group and Epiroc

For example, you may have suffered from a traffic accident, workplace accident, have musculoskeletal disorders, heart disease, herniation, rheumatism, psoriasis, diabetes type 2 or suffer from long-term pain. You can also apply to the rehabilitation program after an illness such as cancer or post-covid. Likewise for stress-related mental illness such as fatigue syndrome, depression or anxiety.

As an employee of Atlas Copco Group and Epiroc in Sweden, you can apply for grants for the following programs at Svenska Re at Gran Canaria.

- **Rehabilitation Injury and Function**

The program is suitable for you with an orthopedic injury, accidental injuries, post-surgery, osteoarthritis or pain.

- **Mental Health Rehabilitation**

The program is suitable for you with stress-related mental illness such as fatigue syndrome, depression or anxiety.

- **Rehabilitation Illness**

The program may be suitable for you if you need to recover from diseases such as COPD, Covid-19, stroke, MS, cancer treatment, Parkinson's or other diseases.

- **Rehabilitation Rheumatism**

There are two different programs suitable for you with any type of rheumatic diagnosis. During the rehabilitation, you will improve your strength, mobility and fitness as well as gain knowledge about how to manage your life with chronic illness.

- **Rehabilitation Diabetes type 2**

The program is suitable for you who have pre-diabetes (elevated blood sugar) or diagnosed type 2 diabetes. The goal of the program is to achieve a change of lifestyle and to create good new habits with a focus on weight loss.

- **Rehabilitation Heart**

The program is suitable for you who have had a heart attack or have a heart disease. Exercise and a change of lifestyle can make a big difference to health.

- **Rehabilitation Psoriasis**

The program addresses you with psoriasis and offers an individually adapted treatment concept where the objective is a long-term improvement.

Scan the QR code below to learn more and watch a short film about the programs at our partner Svenska RE. You can also visit www.svenskare.se.

The foundation covers the costs of the granted program (which also includes all meals during the rehabilitation period) as well as travel and accommodation during the stay. To be able to participate in one of the programs you need to have granted preventive sickness benefit from Försäkringskassan or that you have an ongoing sick leave where Försäkringskassan approves that you participate in the requested program as part of your rehabilitation.

A current medical certificate confirming what you are applying for, not older than 6 month at time for application, must be attached to the application.

APPLICATION

The application is made by you personally or a representative appointed by you at: [https:// www.stipendieansokan.se/pri/stiftelsen-5-oktober-1969](https://www.stipendieansokan.se/pri/stiftelsen-5-oktober-1969). The person completing the application need to have access to a computer and BankID. If you do not have access to a computer, BankID or someone who can apply on your behalf, please contact the Foundation's administrator: PRI Pensions- och stiftelsetjänst AB, stipendieansokan@pri.se, tel. +46-31-778 30 70. The application must contain a medical report. When applying, you must also inform your manager and your HR manager.

There are two application periods per year. The last day of application for each period are **March 31 and August 31**.

ABOUT THE FOUNDATION

The foundation was established in 1969, and funds were donated by Marcus Wallenberg, the then chairman of the board of Atlas Copco, on his 70th birthday. The foundation aims to provide Atlas Copco Group and Epiroc employees in Sweden, as well as retirees from the two companies in Sweden, Norway, Denmark, and Finland, with the opportunity to apply for grants for rehabilitation. Retirees also have the opportunity to apply for grants for glasses/contact lenses, hearing aids, and dental care.
